

Free Third Saturday Event
**NASA Glenn Visitor Center and
The Cleveland Indians present
The Science of Baseball**

April 18, 2009, 10 a.m. to 3 p.m.

What makes a curveball curve? How does the weather change the flight of a baseball? What makes a field a hitter's or a batter's park? Find out how rocket science and aerodynamics can be applied to baseball. Then, look back at baseball history and hear how technology has improved the game.

11 a.m. - The Science of Baseball by NASA researcher Tom Benson

1 p.m. - How Technology Has Improved Baseball by Indians Manager of In-Game Entertainment Annie Merovich

Plus, baseball crafts and activities, "Picture Yourself in Space" digital photos and more.

See Web site for details.

- Space is limited at presentations. Call (216) 433-9653 to register.
- Access to the NASA Glenn Visitor Center is limited to U.S. Citizens.
- All adult visitors are required to present government-issued photo identification.

Free admission always!
